## Meta Data

**Population by age group:** Refers to the age at last birthday before the reference date (before May 10, 2011).

**Median age:** The median age is an age 'x', such that exactly one half of the population is older than 'x' and the other half is younger than 'x'.

**Occupied dwelling:** Refers to the structural characteristics and/or configuration (dwelling is a single-detached house, an apartment in a high-rise building, a row house, a mobile home, etc).

**Average number of children per family:** Refers to total number of children in all census families divided by the total number of census families in private households.

**Elizabethtown-Kitley:** has been bisected into the pre-amalgamation Census sub-division geography for this COS. Census data has been extrapolated to best reflect this change.
